SUMMARY

Product, Program, and Community Operations leader with 7+ years of experience delivering multi-country initiatives across NOAM, Africa and global markets. Proven track record translating customer insights into product improvements, leading cross-functional execution, and scaling products and communities through data-driven decision making. Experienced working across Product, Engineering, Sales, Marketing, Partnerships, and Operations to deliver measurable business outcomes, including supporting institutional partnerships totaling \$62,000 across South Africa, Rwanda, and Poland. Strong background in customer discovery, stakeholder management, agile delivery, product operations, global event coordination, community-led growth, and AI-enabled workflows. Global Shapers Community Delegate (World Economic Forum, Summer DAVOS 2024), Watson Institute Scholar (USA), CFC Chatham House Member.

EXPERIENCE

Community & Product Operations Specialist

Osmosis (from Elsevier)

February 2023 – Present, US, Remote

- Led execution of a global community and product adoption program spanning more than 60 countries, coordinating regional leads, student ambassadors, Product, Engineering, Marketing, Sales, and senior leadership within a matrixed operating environment.
- Partnered closely with Product and Engineering teams to translate customer feedback, user pain points, and community insights into product improvements and feature prioritization, contributing to initiatives including Osmosis AI and Osmosis Spanish.
- Supported commercial initiatives by leveraging community intelligence and institutional relationships, contributing to partnerships totaling approximately \$62,000 with the University of Pretoria (South Africa), University of Global Health Equity (Rwanda), and the Medical University of Lodz (Poland).
- Built executive reporting and performance dashboards demonstrating program impact following Elsevier's acquisition of Osmosis, tracking over 50,000 completed referrals, 530+ student-led events, institutional partnerships, and engagement metrics.
- Owned end-to-end program execution including implementation planning, milestone management, deliverable tracking, dependency identification, risk mitigation, and executive progress reporting.
- Streamlined operational workflows for more than 200 monthly user requests through structured intake and prioritization processes using Notion, Jira, Google Sheets, and Loop, significantly improving coordination across Product, Engineering, and Operations.

Founding Curator

Global Shapers Community (An Initiative of the World Economic Forum)

March 2023 – June 2024

- Founded and led the Ota Hub's digital upskilling initiatives, developing strategic program plans, coordinating volunteers, and executing community projects focused on youth employability and emerging technologies.
- Built partnerships with local organizations and ecosystem stakeholders supporting initiatives reaching more than 100 young people.
- Represented the Global Shapers Community at the World Economic Forum's Summer DAVOS Annual Meeting 2024 in Dalian, China, contributing to discussions on AI and Virtual Reality.
- Participated in the Global Collaboration Village, exploring the use of immersive technologies to address global development challenges.

Community & Developer Relations Manager

The Bulb Africa

April 2022 – February 2023, Lagos, Nigeria

- Increased developer platform usage by 50% through the implementation of a community engagement strategy combining Discord, content programming, and targeted developer outreach.
- Designed implementation plans and stakeholder communications for strategic initiatives including a fully funded \$5,000 Women in Tech Scholarship Program.
- Launched the organization's first in-person developer engagement program within three months, bringing together over 300 attendees including developers, customers, prospects, and partners while generating more than 20 strategic partnerships.
- Expanded partnership collaborations by 60% through the launch of FUTURE Z and DEVTHON 1.0 alongside leading tech firms.
- Managed approximately five major community events annually, coordinating interactions among developers, partners, clients, sponsors, and internal stakeholders while aligning Marketing, Partnerships, and Operations teams.

Brand Ambassador / Content Creator

Wubuntu Africa

September 2021 – March 2022, Beijing, China

- Authored top-performing content series generating increased monthly online traffic.
- Created African based stories/unique experience for Wubuntu's Chinese audience.
- Introduced the Chinese audience to unique African communities, history, cuisine, and culture.

Community Advisor

Watson Institute Semester Accelerator

August 2021 – December 2021, Boulder, USA

- Supported delivery of the Watson Institute Semester Accelerator's first hybrid cohort, coordinating scholar experience across both virtual and in-person participants during a critical organizational transition.
- Partnered closely with the Operations Coordinator and Preceptors to identify participant challenges, improve weekly programming, and enhance the overall learning experience.
- Tracked scholar engagement and progress while coordinating timely interventions for participants requiring additional support.

PROJECT

AI for Sustainability (Global Collaboration Village)

World Economic Forum • www.globalcollaborationvillage.org/

- Selected to participate in climate-focused panel discussions within the World Economic Forum's Global Collaboration Village, exploring how Artificial Intelligence and Virtual Reality can accelerate sustainability initiatives.
- Collaborated with global participants in immersive virtual environments to synthesize perspectives and propose innovative approaches to complex environmental challenges.

Fan Engagement & Creator Economy

ROOMZ • www.roomz.vip/

- Defined the product vision, MVP scope, and feature prioritization based on user needs, competitive research, and commercial objectives.
- Authored comprehensive Product Requirements Documents (PRDs), user stories, acceptance criteria, feature specifications, and engineering documentation to guide product development.
- Managed cross-functional collaboration between software engineers, designers, and external contributors throughout the product development lifecycle using agile principles.
- Designed core product architecture including progressive Web2-to-Web3 onboarding, authentication, digital wallets, creator profiles, raffles, auctions, live video experiences, and payment flows.

OHLI Annual Hackathon

Osmosis from Elsevier (US, Remote)

- Coordinated planning, technical facilitation, and participant experience for a global student hackathon focused on designing innovative healthcare solutions addressing awareness and accessibility for rare diseases.
- Led closely with Product, Community, and Operations teams to ensure successful event delivery and participant engagement throughout the program lifecycle.

Diversity, Equity & Inclusion (Women in Tech Scholarship)

The Bulb Africa

- Designed and coordinated a fully funded \$5,000 Women in Tech Scholarship Program to increase participation of female developers within the technology ecosystem.
